Explanation of login.html (Login Page)

◆ 1. Page Title

- The title of this page is **"Login Page"**.

- This title appears on the **top browser tab**.

◆ 2. Page Background & Font

- The background color is **light gray**, same as the signup page.

- The text style is **Arial**, which is easy to read.

◆ 3. Login Box (White Box in Center)

- All the login details are inside a **white box**.

- This box:

  - Is placed in the **center of the screen**

  - Has **rounded corners**

  - Has a **shadow**, giving it a card-like design

- This makes the login form look **clean and attractive**.

◆ 4. Heading – "Login"

- At the top of the box, **"Login"** is written.

- It tells the user that this is the **login page**.

◆ 5. Input Fields (User Details)

The user must enter:

1. **Username**

   - The user enters their username here.

2. **Password**

   - The user enters their secret password here.

   - The text is hidden for security.

3. **User Type (Dropdown List)**

   - The user selects their role:

       - Admin

       - Student

All these fields are **required**, so the form won't work if they are empty.

◆ **6. Login Button**

- The **Login** button is in **blue color**.

- When the user clicks this:

   - Their entered details will be checked (later using backend like JSP/Servlet).

◆ **7. "Forget Password?" Message**

- Below the login button, there is a message:

   - **"Forget Password?"**

- This is for users who forgot their password.

- Later, this can be connected to a **password recovery system**.

◆ **8. Signup Link**

- A **Signup** link is given at the bottom.

- If the user does **not have an account**, they can click this link.

- It will take them to the **Signup Page (signup.html)**.
